

- Gain productivity with highly efficient data processing
- Enforce controls & compliance with best-in-class Oracle Integrator
- Drive performance with accurate data input

- Centralized version control
- Control user access
- Allow specific functionalities access
- Define Mandatory fields
- Specify default values

Excel template includes a Simplified Loader toolbar containing operations specific to the template. The toolbar operations connect with Oracle Fusion and exchange data with Oracle. The output of the operation gets displayed in Load Status and Error Message fields in the Excel template.

Salient Features

- Lookups
- Flexible Excel Layout
- Specify default values
- Operate on selected records
- Single click DFF setup
- Supports create, update, delete, and download operations
- No installation required in users machine

Security Features

- SSO support
- No Plug-In
- Transaction data flow directly to Fusion - No middleware
- HTTPS data transfer protocol

Maximize Efficiency and Minimize Errors

Accurate data input is vital for efficient reporting. Features offered by the Simplified Loader Excel template assist in precise data input.

- All data required for processing is entered in a single sheet. Define the parent-child relationship by repeating the child record.
- Flexibility to move columns around or insert a new custom column.
- Lookups to select the values defined in Oracle Fusion.
- Enter default data for any field available in the Excel template.
- In case of upload failure, the error message is displayed to the user in real time. Resolve errors and re-upload transactions from within the same sheet.

Data flow and security

Simplified Loader Excel templates exchange transactional data between Excel and the selected Oracle Fusion environment. The Excel template supports user validation using a Single Sign-On service (SSO) associated with Oracle Fusion or the login credential stored within Oracle Fusion.

Simplified Loader Excel templates are macro-enabled Excel files. The

Excel templates can be shared within your team like any other macro-enabled workbook.
